

## Appropriations Slate - April 11th, 2021

### Individual Research Project

#### **Background:**

Murtuza Sarwat Taqi is requesting \$650.00 as a student stipend while he works on completing a summer research project.

#### **Decision:**

The committee has decided to not recommend funding this student's proposal for the following reasons taken from the standing rules:

- Requests must be for a program to be implemented in the same academic year in which funding is awarded. His project is going to be worked on and completed over the summer.
- Students or student groups that do not implement their program, which funding is provided for, in the same semester that funding is awarded, may forfeit the awarded amount.

Additionally, appropriations funding is typically used for projects that aid the university and student body. His request for funding is for direct payroll purposes to him. His research mentor, Dr. Tim Wiser, suggested that Student Government investigate potential funding opportunities for summer research opportunities for our students.
